C Rotation beyond each slice crossing against its angle
main region: 39 points, median |difference| 5.8e-04
right wing: 31 points, median |difference| 3.6e-04
rotation 0.002 decades beyond
crossing angle of the period-2 multipliers (turns per two steps)
complex-pair crossing (Neimark-Sacker candidate)
resonance point, same-rotation locked cells nearby (null fraction <= 0.05)
resonance point, none nearby
