A Width of the locked interval
post hoc slope,
deepest 3 levels: 1.518
network, right 1/5 root
normal-form control
slope 1.5 (theory)
width (decades)
detuning beyond the root (decades)
B Amplitude relative to the 2-cycle
post hoc slope,
deepest 3 levels: 0.513
amplitude
detuning beyond the root (decades)
C Frozen estimator; outcome:
alternative ancestry
frozen linear fit, all 6 levels
post hoc fit, deepest 3 levels
frozen tolerance
frozen intercept
centre offset from the root (decades)
1e−3
detuning (decades)
1e−4
